SPRING 2024 PROGRAM

1ST APRIL 2024

Rikka Spa offers a wellness journey designed to imbue a deep sense of place, in a sanctuary of warmth and tranquillity, where guests can unwind their bodies, relax their minds and regain vitality.

Created in collaboration with Lapidem Tokyo, our programs are created around a philosophy that “true beauty only comes from good health”. Our wellness journey is designed based on oriental medicine, traditional remedies and healing methods that have been handed down since ancient times, and follows the natural order of things, supplementing what is lacking and eliminating what is superfluous in order to restore balance and achieve a lifestyle full of physical and mental health and fulfilment.

Rikka (六花) means snow in Japanese with the literal translation meaning 'flower of six' representing the beautiful hexagonal snowflake. Rikka perfectly represents our six key elements (Wood, Fire, Earth, Metal, Water together with Yin Yang principle) through the blessings of nature.

SETSU NISEKO X LAPIDEM TOKYO

All our spa treatments and programs are curated by award winning spa Lapidem Tokyo, widely recognised as one of Japan's leading day spas and consistently conferred awards for 'Best Luxury Spa' and 'Best Day Spa' in Japan. Treatments use a selection of Lapidem products that focus on natural ingredients to maximize the skin's natural ability to improve its health and well-being.

Rikka Spa is managed in collaboration with Conceptasia, a pioneer in the wellness and spa industry operating and managing many of the leading hotel spas across Japan, as well as China and Korea.

WELCOME RITUAL

The Rikka Spa wellness journey begins with a 'Welcome Ritual'. Local seasonal herbs and spirits are used, as well as salts and essential oils with healing properties. We believe in the importance of supporting our local business community whenever we can; locally produced peppermint oil, fresh herbs, and leaves from Chise Garden Farm, and Hokkaido sake are some of the natural ingredients used in our welcome and wake-up rituals.

By performing the ritual before the treatment, the mind and spirit are soothed and the benefits of the treatment are further enhanced. At the end of all treatments, the 'Wake Up Ritual' using peppermint and medicinal herbs will gradually lead you from a state of deep relaxation back to the present.
